COMPSCI 597: Big Data and NOSQL Databases

Assignment 6

Tanner, Reuben, Trisca, Gabriel

November 5, 2013

Copy of the dataset (load it on the onyx server and provide the location) (20 points)

Analysis of the data (For example, if you were using white house dataset from 2011-2013 to predict the number of times person B will visit person A in 2014, provide an explantion of why do you think that data would be able to help answer that question?) (20 points)

Data cleansing issues that you identified and how did you address them? (10 points)
